01. COMPANY

Our Passion — Quality Windows

Stile Windows specializes in that perfect blend of function and design.

Our quality comes from our passion – our passion comes from our principles. With a focus on exceptional quality, value, service, and options, our products can bring your architectural vision to life. Whether you are remodeling, building new, or renovating a historic building – we have products that will complement your design.

Since 1978, we have provided the Northwest with finely crafted wood windows and doors. From our factory in Burlington, Washington we strive to

bring a high quality product to the industry built around the belief that craftsmanship and service should never be sacrificed. Our hands-on approach ensures that exceptional detail is put into every aspect of our products.

With a strong commitment to value, solid reputation in the community, and over 39 years of experience manufacturing wood windows and doors – you can count on a consistent product delivered every time.

02. PRODUCT DETAILS

It's In The Details

Our products begin with carefully selected components of solid wood in various species and cast bronze hardware on select products. We pride ourselves in putting some of the most advanced insulated glass and low-e coatings available in our windows. Many of our components are sourced

locally from Northwest companies. Our extensive product line includes most types of operation and design; making the options endless. From traditional double hung and European tilt & turn windows, to bi-folding and lift & slide doors, we can fill almost any opening, creating the feel that you desire.

Wood Windows & Doors

A look no other type of material can achieve. Wood is sustainable. Wood is Beautiful. Wood can be painted or stained to achieve the desired look. Wood is customizable in dimensions and profiles. There are many types of wood we can build windows out of that all have their own character. When maintained, wood can last a long time.

- Bays & Bows
- Double Hung Quick Kits for retrofitting
- Replacement Casements for retrofitting

Doors

- Swing
- Sliding Patio
- Multi-slide
- Lift & Slide
- Bi-folding

03. ARCHITECTURAL STYLE

Customized for You

Focusing on finer details is a part of every Stile window. Whether you are building new or making an old building shine we have decorative options that get the details right. Add decorative details such as simulated divided lites, true divided lites, various sticking profiles, or thermal leaded glass. We are confident we can make your project look

just the way you want it to. If you can't find what you are looking for in our standard product offering we also pride ourselves in our ability to customize. From glazing profiles to frame profiles to types of operation, we have recreated historic windows and built modern windows that are not in our standard product offering.

Traditional

Cozy up to your window seat with a cup of coffee. Let the breeze flow by opening the top of your traditionally styled double hung. Choose our traditional long bead interior detail with a bevel bead exterior to simulate the look of a traditional wood window. Choose from our retrofit products for replacing existing windows or our traditional looking new windows for additions or complete window replacements. Add leaded glass or wood grids to complete the look.

Contemporary

Sit down to a glass of wine and enjoy the view. Let the outside in with large sliding door panels effortlessly gliding out of the way. Choose our square interior detail and bevel bead exterior. On our casement windows you can choose a narrow stile and rail. Mull them with direct glaze picture windows to complete the look. Add a lift and slide door and your vision of expansive views will come to life.

Commercial

Smell the grill when you slide open the entire front of your restaurant. Let customers waltz in with unobstructed openings and view the latest displays with large picture windows. Choose between different types of operation - sliding, folding, swinging, pivoting - to achieve the desired feel for your commercial space and the application that it is needed for.
